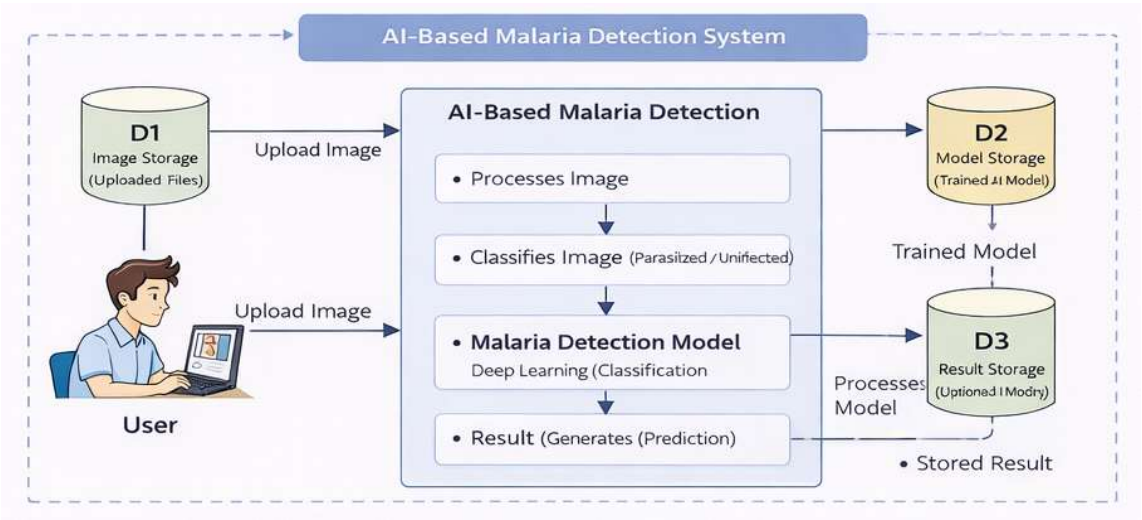
Project Design Phase-II

Data Flow Diagram & User Stories

Date	16 February 2026
Team ID	
Project Name	Malaria Detection using Deep Learning
Maximum marks	4

1. Data Flow Diagram (DFD)

A Data Flow Diagram (DFD) visually represents how data moves within the system. It shows data input, processing, storage, and output. In the malaria detection system, the DFD represents how users upload images, how the system processes them using deep learning, and how results are generated.



2. User Stories

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
User	Image Upload	USN-1	As a user, I can upload a blood smear image for malaria detection	Image upload is successful	High	Sprint-1
User	Image Processing	USN-2	As a user, I want the system to process the image using AI	Image is processed and analyzed	High	Sprint-1
User	Prediction Result	USN-3	As a user, I can view the malaria prediction result	Result is displayed (Parasitized/Uninfected)	High	Sprint-1
User	Result Confidence	USN-4	As a user, I can view confidence score of prediction	Confidence score is shown	Medium	Sprint-2

User	User Interface	USN-5	As a user, I can use a simple and interactive interface	UI is user-friendly	High	Sprint-1
Admin	Model Management	USN-6	As an admin, I can update the deep learning model	Model update is successful	Medium	Sprint-2
